

# Vladimir Kim

## Platform Engineer | Infrastructure Engineer | Backend Developer

[in linkedin.com/in/vladimir-kim-7b20a6223](https://www.linkedin.com/in/vladimir-kim-7b20a6223) [github.com/kvladsrc](https://github.com/kvladsrc)

📞 +48 451 633 718 @ v.a.kim1988@gmail.com

📍 Poland

## 👤 Professional Summary

Platform engineer with 10+ years of experience building and operating production infrastructure. Strong in Go services, Kubernetes and OpenShift platforms, CI/CD, and cloud automation on GCP. Comfortable moving between backend development and infrastructure work : designing reliable systems, improving delivery pipelines, and simplifying complex engineering platforms.

## 🎯 Target Positions

Platform Engineer / Infrastructure Engineer

DevOps Engineer

Backend Developer (Go)

Software Engineer, Infrastructure

## 🔧 Technical Skills

|                                 |                                                                                 |
|---------------------------------|---------------------------------------------------------------------------------|
| <b>Programming</b>              | Proficient in Go and its ecosystem ; experience with C++                        |
| <b>Linux and operations</b>     | Bash, coreutils, Ansible, RHEL, NixOS, Debian                                   |
| <b>Containers and platforms</b> | OpenShift, Kubernetes, OCI containers, Docker, cloud-native platform operations |
| <b>Backend and APIs</b>         | gRPC, Protobuf, distributed services                                            |
| <b>CI/CD and GitOps</b>         | Jenkins, Zuul CI, ArgoCD, FluxCD, Bazel, Gerrit, Cloud Build                    |
| <b>Cloud and infrastructure</b> | GCP, Terraform, production troubleshooting, performance analysis                |

## 🏢 Work Experience

|                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
