PROFESSIONAL SUMMARY

Platform engineer with 10+ years of experience building and operating production infrastructure. Strong in Go services, Kubernetes and OpenShift platforms, CI/CD, observability, and cloud automation on GCP. Comfortable moving between backend development and SRE work: designing reliable systems, improving delivery pipelines, and keeping complex platforms understandable.

TARGET POSITIONS

- Platform Engineer / Infrastructure Engineer
- Site Reliability Engineer (SRE)
- DevOps Engineer
- Backend Developer (Go)

TECHNICAL SKILLS

- Proficient in Go language and ecosystem; have experience with Python and C++.
- Experienced in Linux OS and operations: Bash, coreutils, Ansible, RHEL, NixOS, and Debian.
- Experienced in container-based infrastructure: OpenShift, Kubernetes, OCI containers, Docker, and cloud-native platform operations.
- Familiar with backend and API design: DRF, gRPC, and Protobuf.
- Familiar with CI/CD and GitOps practice: Jenkins, Zuul CI, ArgoCD, FluxCD, Bazel, Gerrit, and Cloud Build.
- Experienced in cloud automation and observability: GCP, Terraform, Prometheus/Thanos, Alertmanager, Grafana, ELK, and performance troubleshooting.

WORK EXPERIENCE

Dec 2022 - Present

System Engineer at EPAM Systems Poland

- Develop Go microservices with a focus on reliability, maintainability, gRPC APIs, and test coverage.
- Manage build systems and cloud resources across large engineering projects.
- Improve infrastructure automation and developer workflows around Bazel, Gerrit, Terraform, Cloud Build, and GCP.

Technologies: Bazel, Gerrit, Terraform, Cloud Build, GCP, Go, Protobuf, gRPC

May 2021 - Oct 2022

DevOps Engineer at Sberbank Kazakhstan, CIB

- Operated Linux and OpenShift infrastructure for containerized services.
- Built observability flows across metrics, logs, dashboards, and alerting.
- Led GitOps and platform delivery initiatives using Helm, ArgoCD, Jenkins, and Ansible.

Technologies: OpenShift, Helm/Helmfile, ArgoCD, Jenkins, Ansible, Kafka, ELK, Prometheus/Thanos, Alertmanager, Grafana, RHEL

Dec 2014 - May 2021

Programmer / System Administrator at Polpharma, SA

- Built internal business applications and backend APIs with Python.
- Administered Linux servers, load balancing, monitoring, and containerized deployments.
- Maintained SAP ERP and Oracle database environments, including availability and performance work.
- Supported data processing pipelines using Hadoop and ETL tooling.

Technologies: Docker Swarm, Python, HAProxy, Nginx, Ansible, Hadoop, Oracle RDBMS, SAP ERP

Nov 2012 - Oct 2014

Developer at openerp.kz, Llp

- Developed backend services using Python web and asynchronous frameworks.
- Implemented embedded Linux integrations on Raspberry Pi with peripheral devices.

Technologies: Twisted, asyncio, C, Raspberry Pi, Linux
